SUMMARY

Backend Software Developer with 1.5 years of experience engineering scalable web services with **Python (Django DRF, FastAPI)**, **PostgreSQL**, and **AWS (EC2, S3, RDS, IAM)**. Skilled in database query optimization (eliminating N+1 bottlenecks), distributed asynchronous queues with **Celery & Redis**, GenAI integration (LangChain, Gemini 1.5), and automated test-driven development with **PyTest**.

TECHNICAL SKILLS

Languages & Core: Python, Data Structures & Algorithms, Object-Oriented Programming (OOP), SQL
Frameworks & Libs: Django (WSGI/ASGI), Django REST Framework (DRF), FastAPI, Celery, LangChain
Cloud & DevOps: Amazon Web Services (AWS — EC2, S3, RDS, IAM, Security Groups), Docker, Linux/Bash
Databases & Cache: PostgreSQL (Query Optimization & Indexing), MySQL, Redis (Pub/Sub & Caching), MongoDB
APIs & Protocols: RESTful APIs, WebSockets, JWT, OAuth2, Swagger / OpenAPI, Third-Party Integrations
Testing & Tools: PyTest, unittest, Git, GitHub, Agile/Scrum, Code Reviews, AI Tools (Copilot, Cursor)

WORK EXPERIENCE

Software Developer — Edso Services Pvt. Ltd. (PeopleNexusAI) Jul 2025 – Present | Pune, India

- Designed and deployed scalable backend microservices and REST APIs using **Django DRF** and **FastAPI**.
- Optimized PostgreSQL data-access layers via Django ORM (`select_related`, `prefetch_related`), eliminating N+1 queries and reducing latency by **35%**.
- Architected distributed background worker pipelines using **Celery & Redis**, integrating **LangChain & Gemini 1.5** for automated dataset extraction.
- Configured secure **AWS EC2 Linux instances**, managed **S3 storage**, and enforced **AWS IAM** least-privilege policies.
- Authored automated test suites with **PyTest** maintaining **85%+ coverage** and led agile sprint code reviews.

Software Developer Intern — Edso Services Pvt. Ltd. (PeopleNexusAI) Mar 2025 – Jun 2025 | Pune, India

- Developed RESTful API endpoints and database migrations using **Django and DRF** under senior engineer mentorship.
- Optimized database interactions and resolved API performance bottlenecks, adhering to production code conventions.
- Authored unit test cases and participated in daily agile sprint reviews, resulting in a full-time Software Developer offer.

Data Science Intern — Ai Variant Aug 2024 – Dec 2024 | Pune, India

- Built and evaluated a Bankruptcy Prediction ML classification model achieving **95% accuracy** and reducing prediction error by **20%**.
- Streamlined data preprocessing and feature engineering pipelines using **Pandas & NumPy**, cutting runtime by **40%**.
- Delivered data visualization dashboards and actionable risk-mitigation insights to cross-functional stakeholders.

PROJECTS

WebSocket Real-Time Messaging Engine *Django DRF, WebSockets, React, Redis, PyTest*

- Engineered a full-stack real-time messaging layer with secure Django REST APIs and a React frontend, backed by Redis pub/sub.
- Achieved **sub-50ms message broadcast latency** and a **95% reduction in connection drops**, fully tested with PyTest.

Scalable Background Task Processor *Django DRF, Celery, Redis, Gmail API, AWS EC2*

- Built an asynchronous worker pipeline integrating the Gmail API via REST, offloading blocking I/O to improve response times by **45%**.
- Configured task prioritization queues, dead-letter exchanges, and exponential backoff retry policies for fault-tolerant execution.

Async AI Document Parser *FastAPI, LangChain, Google Gemini 1.5, Python*

- Developed an asynchronous document parsing microservice using **FastAPI, LangChain**, and **Google Gemini 1.5**.
- Automated entity extraction to transform unstructured business files into structured JSON schemas with **98%+ accuracy**.

EDUCATION

B.E. in Computer Science 2020 – 2024
SSBT College of Engineering & Technology, Jalgaon
CGPA: 8.91 / 10

CERTIFICATIONS

- Data Science Certificate (KNIME)** — ExcelR (2024)
- Deep Learning Specialization** — Coursera (2024)
- Programming in C** — NPTEL (2022)
